Welcome

Christina Colón, Co-Chair
Introduction and Agenda Review

Christine Kefauver, Facilitator
The Public Comment Period begins at 10:45 a.m., or as soon as the agenda items are completed.

Requests to comment that were received by 5 p.m. yesterday will be addressed during the Public Comment Period.

When your name is called, we will unmute your line in order for you to provide comment within your allotted time of 3 minutes.

Only one person at a time will be unmuted; if you have self-muted please be sure to unmute before speaking.

If you did not submit your request in time to be able to speak today, please email your comments to FDOT.Listens@dot.state.fl.us.
The webinar is being recorded and will be available with other materials on the M-CORES website.

You will remain muted for the entirety of the presentations. We will unmute Task Force members one at a time during the discussion period.

Only one person at a time will be unmuted; if you have self-muted please be sure to unmute before speaking.

We will go through all Task Force members one at a time for a single round; then you may use the “hand raise” function for any additional questions you may have.

Do not put the webinar on hold or take another call, as we will hear your hold music.
Today’s Objectives

- Receive briefing on emerging technology trends and opportunities
- Discuss implications of emerging technologies for corridor development
- Receive public comments
Today's Agenda

9:45 AM  Presentation

9:55 AM  Panel Discussion

10:40 AM  Next Steps

10:45 AM  Public Comments
Task Force is subject to Government in the Sunshine
(Sec. 286.011, F.S., and FL Constitution Art. I Sec. 24)

Task Force members **may not:**
- Discuss with any other member of the Task Force any item that is under consideration for action by the Task Force, except at a duly noticed public meeting
- Send emails that solicit comments from members or circulate responses from members on Task Force business

Task Force members **may:**
- Discuss other matters unrelated to the work of the Task Force with the other members at any time
- Discuss Task Force business with any person who is NOT a member of the Task Force, except that person cannot act as a liaison between or among the members

Connected and Automated Vehicle (CAV) Program

Raj Ponnaluri, PE., PTOE, PhD, PMP
Connected Vehicle and Arterial Management Engineer, FDOT
Business Plan Focus Areas

1. Policies and Governance
2. Program Funding
3. Education and Outreach
4. Industry Outreach and Partnerships
5. Technical Standards and Specifications Development
6. Implementation Readiness
7. Deployment and Implementation
SPaT and FRAME Projects Overview

### SPaT Projects
- US 90 SPaT
  - No. of RSUs: 31
  - No. of OBUs: 4
- Gainesville SPaT
  - No. of RSUs: 27
  - No. of OBUs: 70
- Pinellas County SPaT
  - No. of RSUs: 40
  - No. of OBUs: 4
- Total
  - No. of RSUs: 98
  - No. of OBUs: 78

### FRAME Projects
- I-75 FRAME Gainesville
  - No. of RSUs: 232
- I-75 FRAME Ocala
  - No. of RSUs: 239
- I-4 FRAME Tampa to Orlando
  - No. of RSUs: 100+
- US 41 FRAME Lee County
  - No. of RSUs: 100+
- Total
  - No. of RSUs: 571+

SPaT: Signal Phase and Timing
FRAME: Florida's Regional Advanced Mobility Elements
Project goal is to improve pedestrian and bicyclist safety using CV technologies.

- Alerts to pedestrians and bicyclists using CAV applications
- Alerts to vehicles using CAV applications

Field Technology Equipment

- Roadside Unit
- Onboard Unit
- Camera
- Traffic Signal Controller
- Dynamic Message Sign
- Traffic Signal
- Traffic Sensors
• FDOT has an Automated, Connected, Electric, and Shared Program.

• The department supports exploring ways to build partnerships with shared mobility technology providers.

• FDOT supports infrastructure readiness for promoting shared mobility and electric vehicles deployment.

m·cores
Support economic development
Reduce travel time
Investigate safety and mobility issues
Identify top 10 truck-related crash locations
Upgrade Infrastructure
Increases work-zone safety by removing the driver from a work-zone truck.

Increases safety by reducing fatalities by having a cushion impact in the event of a vehicle crash.
Technology Implications for Transportation Corridors

Panel Discussion
Connected and Automated Vehicle (CAV) Projects

Trey Tillander, PE
Director of Traffic Engineering and Operations
Agenda

- CAV Objectives
- 2018 Crashes and Fatalities
- CAV Applications and Benefits
- Current CAV Projects
- Florida’s Regional Advanced Mobility Elements (FRAME) and Truck Parking Availability System (TPAS)
- Northern Turnpike Connector and CAV Projects
### 2018 Crashes and Fatalities

CAV Applications and Benefits

Improving Safety
- Freight Signal Priority improves freight travel time by reducing delay at traffic signals

Reducing Congestion
- Emergency Vehicle Preemption reduces delay for emergency vehicles

Using Technology
- Autonomous shuttles provide transportation opportunities for all, including the elderly, low income, and disabled
Current CAV Projects

FDACS Office of Energy & Central Florida Clean Cities Coalition: Florida EV Roadmap, 2020

Doug Kettles
Director, Central Florida Clean Cities Coalition
FDACS Office of Energy & Central Florida Clean Cities Coalition

Florida EV Roadmap, 2020
Roadmap Background

1. FDACS Office of Energy
2. Clean Cities
3. Alt Fuel Corridor Nomination
Roadmap Objectives

1. Gather Information & Catalogue
2. Develop EV Infrastructure Models
3. Focus on Evacuation Routes
4. Infrastructure Growth Recommendations
5. Infrastructure Deployment 2020-2023
6. Infrastructure Forecast 2024-2026
7. Final Report due 12/31/2020
Roadmap - Collaborate & Contribute

1. Diverse Set of Collaborators
2. Clean Cities, State Agencies, Infrastructure Developers, Power Providers, Universities, Stakeholders, Others
3. Data to be organized by FDOT District
4. Collaboration Webinars, May and June
5. Ongoing Individual Collaboration, April-September
Considerations

1. Increase in battery efficiency, resulting in 400+ mile range
2. Increase in EVSE output of 600kW+
3. Requirements for thermal management of higher EVESE outputs
4. Increased grid demands at EVSE locations
5. Broad introduction of EV passenger shuttles, taxis, and Transportation Network Companies (TNCs)
6. Initial deployment of autonomous vehicles
7. Inductive charging
8. Networking and internetworking of EVSE
9. Siting and upgrade capabilities
10. Uptime, Resiliency, Backup Power
11. Obsolescence and upgrade of EVSE
12. Social equity and underserved communities
13. Outreach, education, and training
14. Energy consumption
15. Environmental
16. Site Safety
17. Zoning, building codes, and permitting
18. Signage
Stakeholder Interest Group Webinar Schedule*

- 5/12 Power Interests – IOU, Coop, Muni, Supporting Associations
- 5/19 Infrastructure Providers – Manufacturers, Installation, Network, Software
- 5/21 Advocacy – Alternative Fuels, Environmental, Advocacy Organizations
- 6/16 Planning – MPO, TPO, Cities, Counties, State, Regional, National
Project Management
